***Reasons for Allowance***

The following is an examiner's statement of reasons for allowance:

Applicants' amendments are arguments have overcome the rejections issued in the Office Action dated 5/11/06. Applicants' process for producing methanol, as defined by present claims 40 and 41, is unobvious over the prior art of record.

The closest prior art of record {US Pat. 5,384,335} teaches a process for preparing methanol using a copper chromite catalyst and does not teach or suggest using either a catalyst system containing copper simultaneously with manganese and/or rhenium or hydrogenating the formic ester intermediate with a catalyst other than copper chromite to form methanol. The other closest prior art of record {US Pat. 4,939,292}, only teaches the production of formic ester, utilizing a copper catalyst containing rhenium, but does not teach or suggest making methanol. Therefore, it would not have been obvious to one having ordinary skill in the art to arrive at the presently claimed invention. All claims (40, 41, 43, 44 and 46-49) are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
